

## LWVUS Endorses Bi-Partisan VoteSafe.us

This week, LWVUS endorsed a new project with Represent.us along with partners which creates space for nonpartisan organizations and a cross-section of election officials to promote needed reforms in states to make to make voting safe—primarily around VBM. It is called [VoteSafe.us](https://www.votesafe.us). The site includes a state-by-state breakdown of what states need to do, and allows the public to see where and what changes are immediately needed, and use the site as a resource and advocacy tool. The bi-partisan platform also allows elections officials to endorse these needed changes including clean polling locations, online ballot requests, and eliminating double signature laws.
